

## CAREER PLANNING

# Technical / Vocational Education

These schools offer programs for specific certificates or trades/vocations. A Vocational/Technical school may offer programs such as Automotive Technology, Culinary Arts, HVAC or Electrical, Cosmetology, etc. There are even programs to prepare a student to enter the medical field as a technician for radiology or sonography, for example. These programs would prepare you to enter into a specific trade, specific job, or earn a license through an apprenticeship program. There may be options to earn a certificate in one or two years.

Below is a listing of possible Technical/Vocational Education programs located here in American Samoa (and surrounding region) that may help you begin your search. **This is only a partial list.** There is an array of options/programs available off island. Please speak with your school counselor to discuss your specific interests and goals.

### **ASCC Certificate of Completion in:**
